01 | ABOUT US

Where most companies focus on one or two elements, Materia Matters offers an integrated, all-in-one solution; from architectural finishes to fully furnished spaces.

Materia Matters is a female-owned design studio founded by Marcia Godet, built around a deep expertise in microcement and material innovation. Unique in the microcement market, Materia Matters operates as a true one-stop shop, combining a design studio, wholesale material supplier, retail platform and application service within one integrated practice. This cross-disciplinary approach creates a rare level of knowledge, where material development, design and real-world application continuously inform one another.

Our signature microcement is durable, versatile and designed with sustainability in mind, minimizing waste while offering seamless, joint-free surfaces that elevate both interior and exterior spaces. The material can be applied across floors, walls, furniture and architectural elements, creating calm, cohesive environments with depth and texture. Alongside our material expertise, Materia Matters designs sculptural furniture and collaborates with architects, designers and hospitality projects worldwide.

By bringing together material innovation, craftsmanship and architectural design, Materia Matters offers a complete ecosystem where surfaces, objects and spaces are conceived as one unified language.

02 | PERFORMANCE

At Materia Matters, our microcement is engineered to combine aesthetic refinement with outstanding performance. Its high hardness and exceptional abrasion resistance ensure long-lasting finishes that withstand both residential and commercial use. With excellent resistance to water and chemical agents, the material maintains its integrity and appearance even under demanding conditions.

Thanks to its low permeability to liquid water and moderate breathability, surfaces remain protected while allowing the structure beneath to stay in good condition.

Designed for versatility, our microcement can be applied indoors and outdoors, across vertical and horizontal surfaces alike, without compromising strength or beauty. The finish remains stable and does not yellow when exposed to sunlight, preserving the original tone and texture over time.

Together, these qualities make Materia Matters microcement a resilient, durable and reliable choice for projects that demand both performance and elegance.

03 | SUSTAINABILITY

At Materia Matters, sustainability is at the core of everything we do. Our microcement line is lime-based and inspired by ancient tadelakt craftsmanship, combining tradition with modern innovation. This natural composition reduces shrinkage and cracking, ensuring flexible, seamless surfaces with exceptional mechanical and chemical resistance. The lime base provides a unique balance of durability and workability, making it suitable for both interior and exterior applications.

By applying layers “fresh-on-fresh,” surfaces can be renovated and updated without unnecessary waste. Our microcement line offers a wide range of colors and textures in elegant, continuous finishes, free of joints.

Compared to conventional microcements, the natural formulation has a lower environmental footprint. Its mineral base and long-lasting performance make it a conscious choice for sustainable architecture.

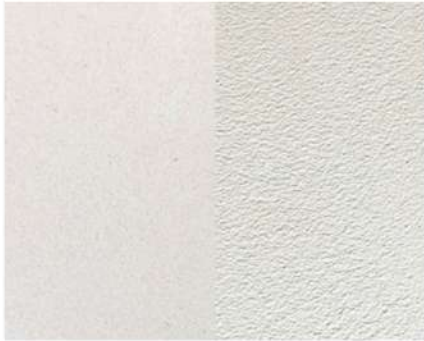

With every project, Materia Matters bridges craftsmanship and environmental responsibility. This is one of the many steps we take towards a more circular and future-proof construction industry.

MICROCEMENT INFO

MINERA is our natural lime-based microcement. MINERA embodies pure sophistication: a seamless microcement finish designed to transcend trends and elevate spaces with understated refinement. Its continuous surface creates a sense of calm and visual harmony, enhanced by a rich palette of solid colors that suit both contemporary and classic interiors.

Available in two distinctive grain sizes: M and XL; delicate small, refined medium and boldly textured large, MINERA offers a unique tactile experience for every design vision. From the silky smooth feel of the finest grain to the expressive depth of the coarsest texture, each variation celebrates the beauty of simplicity and craftsmanship.

Combining aesthetics with performance, MINERA provides a durable, joint-free surface ideal for floors, walls and custom elements. Its seamless application enhances spatial flow while delivering exceptional adhesion, strength and longevity.

MICROCEMENT INFO

Step into the world of SANDURA, where craftsmanship and innovation come together in perfect harmony. Formulated from refined microcement and enriched with carefully selected sand variations, Sandura creates a subtle yet vibrant surface defined by delicate speckled textures that bring depth and movement to every application.

More than a finish, SANDURA is an expression of timeless design. Its versatility allows it to adapt effortlessly to both contemporary and classic environments, while its rich visual character transforms spaces into immersive experiences. Each surface becomes a canvas, shaped by texture, light and color.

Available in an extensive range of shades, SANDURA offers endless creative freedom. From soft neutrals to bold statement tones, its adaptable palette allows designers to translate vision into reality with precision and elegance. Our most iconic and sought after finish now unfolds in an unlimited spectrum of colors, ready to elevate interiors with refined sophistication.

| MICROCEMENT INFO

EARTHEA invites a deeper connection to natural beauty through a finish that balances refined smoothness with organic character. Composed of premium microcement and enriched with finely dispersed clay and soil particles, it reveals a soft, earthy texture that adds warmth and depth to every surface.

The subtle speckling creates a nuanced visual effect, offering quiet richness without overpowering the space. Light interacts gently with the surface, enhancing its tactile elegance and bringing a sense of calm continuity throughout interiors.

Designed to complement a wide range of color palettes, EARTHEA adapts seamlessly to both minimalist and expressive designs. Each tone becomes an understated statement of contemporary sophistication, turning spaces into serene environments defined by texture, harmony and timeless appeal.

MICROCEMENT INFO

MARORA is a celebration of light, texture and refined craftsmanship. This exceptional microcement finish is enhanced with finely integrated shell fragments, creating a surface that subtly shimmers and evolves throughout the day as light moves across it.

The natural inclusions introduce depth and a luminous quality, giving each application a unique visual rhythm. No two surfaces are ever the same, turning walls and floors into living compositions that feel both contemporary and timeless.

Offered in an extensive range of colors, MARORA reveals new layers of character with every shade, from soft, pearlescent tones to rich, dramatic hues. It transforms interiors into immersive spaces of elegance and artistic expression, where materiality becomes the focal point of design.

| MICROCEMENT INFO

ARBOREA draws inspiration from the harmony between nature and craftsmanship, blending the robustness of microcement with the organic essence of wood. Embedded with finely dispersed wood particles in varying tones, this finish reveals a rich, textured surface that feels both tactile and visually dynamic.

The natural inclusions introduce warmth and depth, softening the mineral base and creating a balanced dialogue between raw materiality and refined design. Each application carries its own unique character, echoing the irregular beauty found in nature.

Presented in a curated palette of earthy shades, ARBOREA brings an authentic yet contemporary atmosphere to interiors. It offers a timeless aesthetic that grounds spaces in natural elegance while maintaining a sophisticated architectural presence.

MICROCEMENT INFO

LUMORA introduces a refined metallic dimension to contemporary microcement design. Enriched with delicate brass fibres, this finish reveals a soft, luminous glow that gently catches the light, creating surfaces with depth, movement and understated brilliance.

The subtle golden accents are seamlessly woven into the mineral base, resulting in a balanced composition where strength meets elegance. Rather than overpowering a space, LUMORA enhances it with a quiet sense of luxury and sophistication.

Designed to complement both modern and classic interiors, LUMORA offers a timeless aesthetic with a distinctive character. Each application reflects craftsmanship and precision, transforming walls, floors and custom elements into refined architectural features defined by warmth, texture and light.

BRISCA

MICROCEMENT INFO

BRISCA is composed from finely milled brick powder, transforming architectural heritage into a refined contemporary surface. Its warm, earthy tone carries the depth of fired clay, softened into a smooth and tactile microcement finish. Subtle mineral variations create a quiet movement across the surface, echoing traditional masonry in a modern expression.

The material feels grounded and elemental, yet sophisticated in its execution. BRISCA brings warmth, structure and timeless character to both contemporary and classical interiors.

BRISCA's coloring is natural, hence we do not advice to mix a pigment with this type of microcement.
